

**Sale Name:** Amazon Semi Load Auction- 3085

**LOT 1724 - Cold Therapy System, Programable Ice Therapy**

**Description**

In Packaging?: Yes

Damaged?: Unknown

Model: WLC-001

PROGRAMMABLE Users can flexibly set a on-off loop run according to their own

needs. The programme allows user to set single, loop and non-stop run time. **EASY USE** With a straightforward control panel, users can easily set the times, adjust the flow rates. The water temperature thermometer with three different colors of lights allow users monitor the ice without having to scrutinize the panel or open the bucket. **LOW NOISE** This Cold therapy machine features a high-quality brushless DC motor that operates quietly and smoothly, emitting a low noise level that is barely audible. Users can enjoy uninterrupted cold therapy in a peaceful and relaxed environment, which is essential for effective pain management and recovery. **PORTABLE** Lightweight and equipped with double-wall insulation, the bucket can retain its chill for hours. With a 7-quart capacity, it is roomy enough to store ice for hours but light enough to be carried effortlessly. **FLEXIBLE PAD** Our pad is soft and pliable. The elastic material allows water to flow effortlessly and provides a gentle compression effect, enhancing the efficacy of the therapy.

**Quantity: 1**
